Professional Summary

Full Stack Software Engineer with 1.4+ years of hands-on experience building and maintaining production-ready web applications using the MERN stack. Strong experience in developing RESTful APIs, integrating frontend and backend systems, and delivering end-to-end recruitment and workflow automation features. Experienced in real-time updates using WebSockets and integrating external AI-based evaluation services within enterprise applications.

Technical Skills

Languages: JavaScript (ES6+), TypeScript (Working Knowledge), Java (OCA Certified)

Frontend: React.js, Next.js (Exposure), HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, REST API Development, JWT Authentication

Databases: MongoDB, PostgreSQL (Fundamentals)

Real-Time: WebSockets, Socket.IO

Integrations: External AI Evaluation Services (Audio, Video, Text), REST-Based Integrations

Tools: Git, GitHub, Postman, Docker (Fundamentals), VS Code

Professional Experience

Full Stack Developer

Cognitbotz, Hyderabad

Feb 2025 – Present

- Developed and enhanced full stack features for an enterprise recruitment platform using React, Node.js, Express, and MongoDB.
- Designed and implemented RESTful APIs for candidate onboarding, assessments, job management, and HR dashboard workflows.
- Built end-to-end assessment modules combining MCQ-based tests and video evaluations with consistent UI state management.
- Integrated external AI evaluation services to process audio, video, and text responses and consume structured evaluation outputs.
- Automated consolidated assessment report generation and enabled delivery of results to HR stakeholders.
- Implemented offer letter generation using configurable templates with automated PDF output.

- Enabled external job posting by generating public job links for platforms such as LinkedIn and Naukri.
- Implemented real-time status updates using Socket.IO to synchronize assessment and dashboard data across users.

Frontend Developer Intern

Cognitbotz, Hyderabad

Oct 2024 – Feb 2025

- Developed responsive and reusable UI components using React and Bootstrap.
- Integrated frontend components with backend APIs and authentication workflows.
- Improved UI consistency, accessibility, and cross-device responsiveness through iterative enhancements.

Projects

SkillMatrix – Applicant Tracking System

Tech Stack: React, Node.js, Express, MongoDB, Tailwind CSS, shadcn/ui

- Contributed to the development of an enterprise ATS supporting end-to-end recruitment workflows.
- Implemented backend APIs for resume ingestion, candidate processing, job management, and result storage.
- Enforced role-based access control for HR and administrative users.
- Developed offer letter generation using customizable templates and automated document creation.
- Enabled public job postings through shareable job links.
- Integrated MCQ and voice-based question generation APIs into the assessment platform to support dynamic evaluation workflows.

Live Delivery Tracking System (Personal Project)

Tech Stack: Next.js, React, TypeScript, Node.js, Socket.IO, Redis, MongoDB, Google Maps APIs

- Built a real-time delivery tracking system to display live order status updates.
- Implemented event-driven communication using Socket.IO for server-to-client updates.
- Designed RESTful APIs for order management, user management, and delivery history.
- Ensured consistent state synchronization between frontend and backend during real-time updates.

Education

B.Tech in Information Technology

CVR College of Engineering (JNTU)

2019 – 2023

CGPA: 8.07

Certifications

Oracle Certified Associate – Java SE 8

Google IT Support Certificate
