

# G. Santosh

Full Stack Software Engineer — Applied AI & Real-Time Systems

santoshgudeti@gmail.com — +91 8309085060 — Hyderabad, India

LinkedIn — GitHub — Portfolio

## Professional Summary

---

Results-driven Full Stack Software Engineer with strong expertise in **Applied AI systems, Generative AI integrations, and real-time web platforms**. Experienced in building production-grade AI-enabled applications using MERN stack, **Python-based AI services**, RESTful APIs, WebSockets, and LLM APIs. Proven ability to design scalable recruitment and evaluation systems involving resume parsing, semantic matching, voice-based assessments, and automated decision workflows with measurable performance impact in real-world environments.

## AI System Scale & Impact

---

- Engineered AI pipelines capable of processing **50+ resumes in under 30 seconds** using asynchronous inference and scalable backend workflows.
- Enabled **real-time candidate evaluation and report delivery within 1 minute** through optimized AI scoring and parallel processing.
- Automated **offer letter generation in under 5 seconds**.

## Technical Skills

---

**Programming Languages:** JavaScript (ES6+), TypeScript, **Python**, Java (Oracle Certified Associate)

**Frontend:** React.js, Next.js (App Router), HTML5, CSS3, Tailwind CSS, Bootstrap

**Backend:** Node.js, Express.js, FastAPI, RESTful APIs, WebSockets, Socket.IO, JWT Authentication

**Databases & Caching:** MongoDB, PostgreSQL, Redis (Pub/Sub, Caching), SQL

**Applied AI & Machine Learning:** LLM API Integration (OpenAI-style), Resume Parsing, Semantic Matching, Prompt Engineering, Embeddings Generation, Vector Similarity Search, RAG-style Pipelines, Speech-to-Text (STT), Text-to-Speech (TTS), AI-driven Scoring Algorithms, Evaluation Pipelines, Feature Extraction, Model Inference, Latency Optimization, Asynchronous AI Job Processing, Machine Learning Fundamentals, NLP Concepts

**AI Tools & Libraries:** Python, FastAPI, OpenAI APIs, LangChain (conceptual), Vector Databases (Pinecone / FAISS – conceptual), Tokenization, Chunking Strategies, Prompt Templates

**Real-Time Systems:** WebSocket Architecture, Polling Fallback Mechanisms, Event-Driven Systems

**Architecture & Practices:** Scalable System Design, API Optimization, Authentication & Authorization, Performance Optimization

**Tools & Platforms:** Git, GitHub, Docker, Postman, Linux, VS Code, CI/CD (Exposure), GitHub Actions (Exposure)

## Experience

---

### Full Stack Developer — Cognitbotz, Hyderabad

*Feb 2025 – Present*

- Owned end-to-end development of enterprise recruitment platform features using React, Node.js, Express, MongoDB, and Python-based AI services.
- Designed and implemented RESTful APIs and backend services supporting resume processing, candidate workflows, and HR operations.
- Built AI-driven evaluation pipelines integrating **LLM inference, semantic scoring logic, and asynchronous job queues**.
- Developed real-time features using WebSockets and Socket.IO for live assessments and dashboards.
- Optimized APIs, AI inference paths, data models, and background workers for performance, reliability, and scalability.

### Frontend Developer (Internship) — Cognitbotz, Hyderabad

*Oct 2024 – Feb 2025*

- Developed responsive, reusable UI components using React, Bootstrap, and modern CSS.
- Integrated frontend workflows with backend APIs, authentication, and role-based access control.

## Projects

---

### SkillMatrix — AI-Powered Applicant Tracking System (Company Project)

*Tech Stack: React, Node.js, Express, Python (FastAPI), MongoDB, WebSockets, LLM APIs, STT/TTS*

- Designed and developed a full-scale **enterprise Applicant Tracking System (ATS)** automating the recruitment lifecycle.
- Implemented AI-driven pipelines to **analyze and rank 50+ resumes within 30 seconds** using parallel inference.
- Integrated **LLM-based resume parsing, embeddings generation, and semantic similarity matching**.
- Designed **AI scoring algorithms and evaluation pipelines** for automated shortlisting.
- Built multi-mode assessment workflows (MCQ, text, voice) with real-time AI evaluation.
- Delivered automated evaluation reports and feedback in **under 1 minute**.
- Implemented fault-tolerant AI workflows with retries, fallbacks, and confidence thresholds.
- Developed external job posting and dynamic offer letter generation workflows.

### Live Delivery Tracking System (Personal Project)

*Tech Stack: Next.js, React, TypeScript, Node.js, Socket.IO, Redis, MongoDB, Google Maps APIs*

- Built a real-time delivery tracking system with live GPS updates and ETA calculation.
- Implemented WebSockets with polling fallback and Redis Pub/Sub for high-frequency updates.
- Integrated Google Maps APIs and optimized UI rendering for real-time performance.

## Education

---

**B.Tech in Information Technology** — CVR College of Engineering (JNTU)  
2019 – 2023    CGPA: 8.07

## Certifications

---

- Oracle Certified Associate — Java SE 8
- Google IT Support Certificate
- Full Stack Web Development — MyCaptain
- Database Foundations — Oracle Academy

## Additional Highlights

---

- Strong ownership mindset with excellent debugging and problem-solving skills
- Experience delivering AI-enabled systems used by internal teams and clients
- Passionate about Applied AI, scalable backend systems, and real-time architectures
